

BICEP Statement on the Clean Energy Jobs and American Power Act

The companies of BICEP applaud Senator Boxer and Senator Kerry for their leadership role in introducing this landmark legislation and bringing it to the Senate for full consideration and deliberation by their colleagues. The time to act on climate change and energy policy is upon us and we urge the Members receiving this proposal to consider and act upon it in good faith for the good of the American people, the health of the U.S. economy, and the lives of future generations across the globe.
