

## The Cross-State Air Pollution Rule

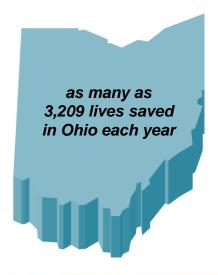

Health and Economic Benefits for Ohio

To protect states afflicted by air pollution from outside their borders, EPA finalized the Cross-State Air Pollution Rule to reduce harmful emissions of sulfur dioxide (SO2) and nitrogen oxides (NOx) from power plants in the eastern half of the U.S. These clean air protections are called for under the "Good Neighbor" provision of the Clean Air Act – a provision ensuring that air pollution discharged by power plants in an upwind state do not contribute to unhealthy pollution levels in downwind states. These protections will help downwind states suffering from this harmful pollution restore healthy air for their citizens and maintain compliance with the health-based national ambient air quality standards.

Under this rule, harmful pollution will be significantly reduced: SO2 emissions from power plants in the eastern half of the U.S. would be reduced 73% and NOx emissions would be reduced 54%. Nationally, this rule will save up to 34,000 lives, prevent 400,000 asthma attacks, and avoid 1.8 million lost work or sick days each year once in place. The economic value of these benefits is estimated at \$120–280 billion each year. These benefits don't even account for the value of increased agricultural crop and commercial forest yields, improvements to visibility, and reduced nitrogen and acid deposition.

## Ohioans will reap vital health benefits from this rule.

Ohio is in the top tier of states that will benefit the most from this rule. The pollution reductions will save up to 3,209 lives<sup>1</sup> in Ohio and provide about \$26 billion<sup>2</sup> in benefits to Ohio each year. These benefits are just those related to avoided mortality, but there are other important health and environmental benefits not quantified here. Under these clean air protections, the quantified health benefits for Ohio are nearly as much as what the state's entire budget was for FY 2011<sup>3</sup>— in other words, these billions of dollars in health benefits are very good news for Ohioans.
