Bill	Description	Covered Sources & other notes
S. 228: Barrasso no carbon regs	The bill pre-empts federal restrictions on greenhouse gasses in the name of addressing climate change, in the absence of explicit Congressional Authorization. This would necessarily include mandatory requirements that may stem from applications of the Clean Air and Clean Water Act, the National Environmental Policy Act and the Endangered Species Act. The bill also precludes legal action against sources of greenhouse gasses solely based on their possible contribution to climate change.	
S. 15: Vitter no CAA regs until China/India		
S. 231 Rockefeller delay	2 year delay from date of enactment	Stationary sources
