### Gov. Schwarzenegger Issues Statement on the American Power Act

Governor Arnold Schwarzenegger today issued the following statement after U.S. Senators John Kerry (D-MA) and Joe Lieberman (I-CT) introduced the American Power Act:

"I am encouraged by this new effort by Senators Kerry and Lieberman to address the challenges of clean energy and climate change at the federal level with a comprehensive energy policy. California has been an unparalleled leader in clean energy, pioneering policies that have benefited the entire nation, and we must be able to continue our important, groundbreaking work that will both improve the environment and help our economy. I continue to believe we need a bipartisan, national climate change commitment that will reduce our dependence on oil, protect our environment, grow our economy and put Americans back to work. I look forward to reviewing the American Power Act and working with Congress and the Obama Administration to ensure it builds on the progress states have made, like here in California."
