### **League of Conservation Voters Applauds President Obama's Attendance at Copenhagen**

WASHINGTON – Today, the White House announced that President Obama will travel to Copenhagen to participate in the United Nations Climate Change Conference. LCV President Gene Karpinski issued the following statement:

“We applaud President Obama for continuing to demonstrate steadfast leadership towards curbing global warming pollution and building a clean energy economy. President Obama’s attendance at Copenhagen, along with that of numerous other cabinet members and administration officials, further underscores that this administration represents a clean break from the past eight years of inaction and disengagement with the global community.

“We welcome that the president has offered provisional reduction targets contingent upon Congressional action and we look forward to working with the U.S. Senate to pass a strong, comprehensive clean energy and climate bill as quickly as possible to ensure that the U.S. can lead in the transition to a clean energy future.”
