

Attention Docket ID No. EPA-HQ-OAR-2009-0234

Dear EPA Administrator Lisa Jackson,

Our families should be able to breathe clean air and drink clean water—without worrying about mercury in their bloodstream, soot and smog in their lungs, and lead in their water. Yet coal-fired power plants spew hundreds of thousands of tons of dangerous pollutants like these into our air and water every year.

Your proposed Mercury and Air Toxics Rule will protect the public from toxic air pollution and save thousands of lives. I urge you to stand strong and cut mercury pollution and acid gases by more than 90 percent in the final rule.

Sincerely,
