## **USCAP Urges Action on Climate and Energy Bill**

Washington, D.C. (April 26, 2010) – *The following is a statement from the U.S. Climate Action Partnership regarding the consideration of climate and energy legislation by Senators John Kerry (D-MA), Lindsey Graham (R-SC) and Joseph Lieberman (I-CT):*

The U.S. faces a critical moment that will determine whether we will be able to unleash billions in energy investments or remain mired in the economic status quo. Americans need and deserve a comprehensive climate and energy policy that will reinvigorate our economy, create American jobs, unleash American innovation, secure our energy independence, and protect our environment.

The U.S. Climate Action Partnership urges the U.S. Senate and this Administration to make comprehensive climate and energy legislation a top priority this year.

USCAP strongly commends the leadership of Senators Kerry, Graham and Lieberman who have dedicated months to working with numerous stakeholders and developing bipartisan solutions. American families will benefit from the jobs created by climate and energy legislation and from a cleaner, more secure future. We urge the Senate to move forward as quickly as possible on this critical issue.
